

Release Date: February 15, 1998

TID Ad for Dir. of Project Dev. See Ad here.

DIRECTOR OF PROJECT DEVELOPMENT

BUTLER COUNTY TRANSPORTATION IMPROVEMENT DISTRICT

Dir. of Project Development will direct, plan and coordinate the development of new TID projects. This includes direction of projects through preliminary development processes: corridor selection, environmental, and preliminary design.

• Develop master project plan for TID and individual project plans assessing need, purpose, feasibility and finances.

• Coordinate project development with related local, county, state and federal agencies, community and regional planning organizations, and business.

• Direct engineers and consultants in designing new projects. Review and update plans and designs.

• Knowledge of transportation laws and regulations; of highway design and planning; of civil and structural engineering, of drainage laws and principles; of zoning regulations; of economic development principles; and of budgeting is essential.

Requirements: Bachelor's degree in civil engineering or related field, 10 years experience in construction management with substantial experience in road construction, at least 5 years managerial experience. Equivalent combination of education and experience is acceptable.

The TID, an equal opportunity employer, offers a range of competitive benefits.
